

## Non-Native Species Can you name a species that lives in Ontario but is not native to Ontario? Do you think that species has an impact on the natural environment? How and why did the species get here?

## **Non-Native Species**

There are well over 3000 invasive species in Canada. In the Great Lakes, there are over 185 invasive species.

## Non-Native Species

Invasive species have significant environmental and economic impacts.

These species **change** natural ecosystems and cost Canadians billions of dollars annually just to control their **population size**.
